Unit 01 - Practice 10: Examples of Free Licenses

Task 10: Examples of Free Licenses

We are going to look for applications that have licenses cataloged as *free* (Do not confuse with **free**), that we can install in our house and in various Operating Systems.
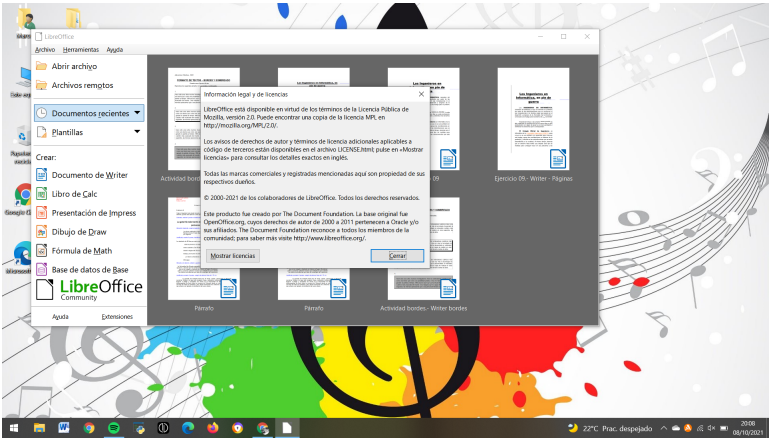

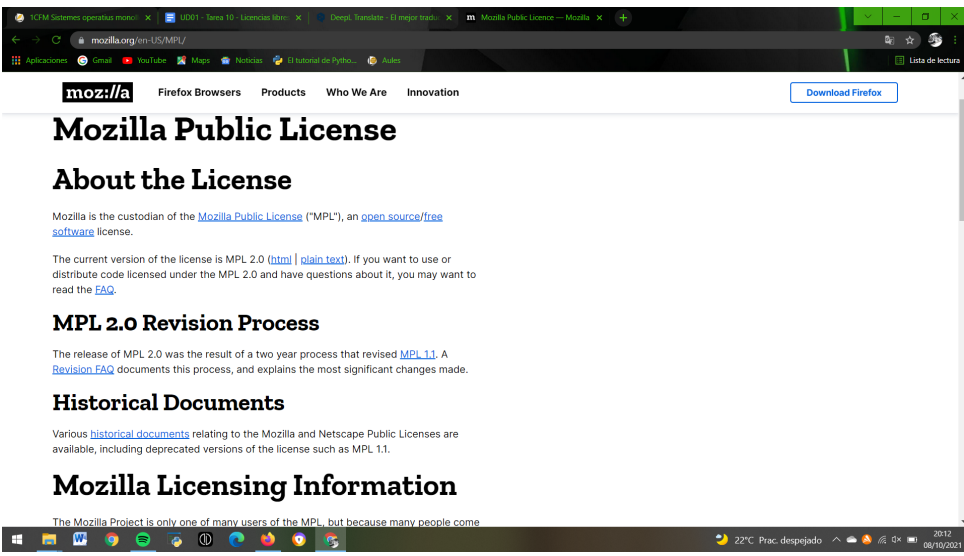

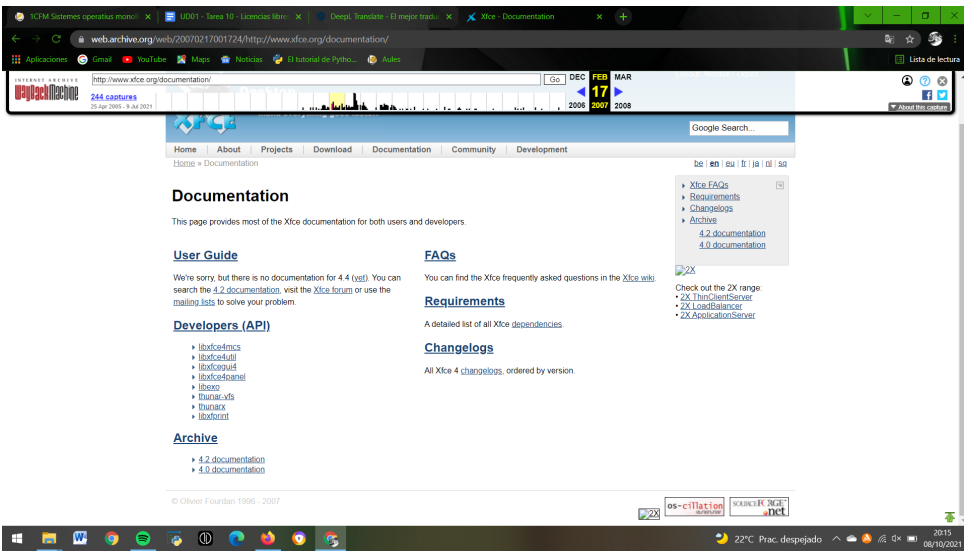

In the first part of the practice, we will look for the license of certain programs, while in the second we will look for programs that have a certain license.
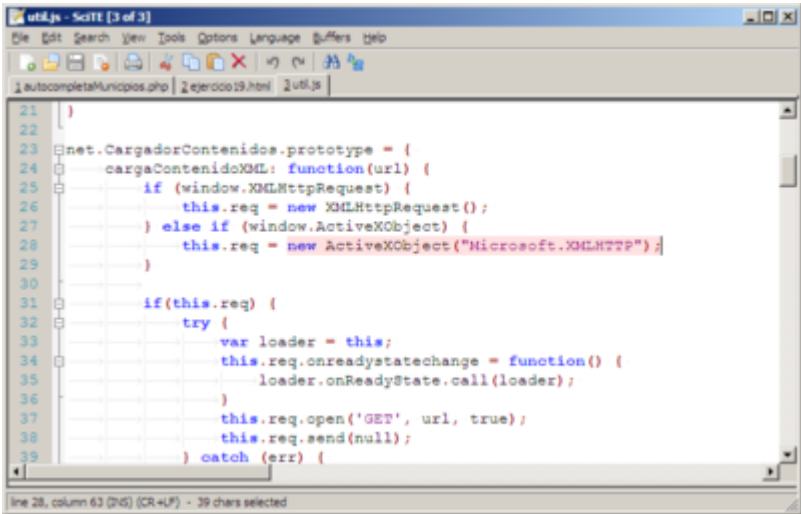

Program Licenses

For each of the programs listed below, find its license in the menus or installed files of the program and attach a screenshot showing the license.

Fill in the following table as you go looking for each of the programs.

Program	License
LibreOffice	
Mozilla Firefox	
Mousepad	

VideoLan	VLC is available under GNU license on multiple desktop operating systems, as well as for Android and iOS mobile platforms. VLC is very lightweight and has been improved over time to include advanced video playback features.

Gimp	GIMP (GNU Image Manipulation Program) is a program for editing digital images in bitmap form, both drawings and photographs. It is a free and open source program. It is part of the GNU project and available under the GNU General Public License.
Scite	
WireShark	

Wireshark

Parte de la familia Network

Wireshark, herramienta con interfaz gráfica para el análisis y captura de paquetes en una red.

Desarrollador	The Wireshark team
Última versión estable	1.4.3
Plataformas soportadas	Multiplataforma
Idioma	Ingles
Licencia	GPL

Sitio web
http://www.wireshark.org/

Chromium Browser	Chromium. It is an open source web browser project, from which the Google Chrome source code is based. This application is very similar to the original Google Chrome. The application was compiled based on open source components such as the WebKit rendering engine and its application development framework.

In case there is no program from the list on your computer, look for an alternative that you already have installed and describe the license. Try to reach 8 programs, all with the licenses in the Free category that we have seen in class and in theory.

Licensed Programs

Now the challenge is different, it is about searching the Internet for Software that you would install at home or in a small business that has the following licenses:

License	software
GPL	Free software and open source
GPL v3	Free software
Mozilla Public License	Free software and open source
